

# Game ideas for the spring season

The days are getting longer, the first early flowering plants sprout out of the soil and the cold season is (almost) over – it is the best time to get prepared for the coming spring season. Get ready to get your kids out for some fresh air - with these three funny games!

## Game 1 The funny obstacle course

First of all you have to set up the obstacle course or maybe you know a hilly rocky way in the area to build it up there. You have to define the exact way. Two or more players will be equipped with a metal cart. A bucket filled with water has to be placed on the metal cart.

Here we go - every player starts running as fast as possible mastering the course. The aim is to spill as less water as possible out of the bucket. The game gets particularly exciting if you previously set up a time limit. This increases the level of difficulty.

These toys are needed:

Metal Cart and Sand Bucket, large

## Game 2 Name the city

At least two players are gathering in the open air in front of a wall having a ball with them. One player starts by throwing the ball against the wall. At the same time he is calling the name of a city. The other player catches the ball, throws it against the wall and has to call the name of a city starting with the final letter of the previous one, like Berlin - Nuremberg - G ... The winner is the one who managed to call last the name of a city. This game can also be changed to many other topics, such as names or animals.

These toys are needed:

Different balls

## Game 3 The colourful hopscotch

Here your creativity is required. With coloured chalk you can draw a hopscotch on the road or sidewalk. Circles, boxes or other forms that can fit your foot should mark the way. Often numbers are drawn into the forms so that the correct order can be seen. Now the children are jumping with one or two legs on the painted fields. They must not be transgressed and you have to jump in the specified order. The pictures show some examples.

These toys are needed:

Street chalk
