

# Children – kids birthday planner for parents ✂️ 📄

Birthdays are an exciting event for every child. In order for this day to be celebrated properly, this birthday planner helps in all preparations and grants a memorable day.

## Step 1 – A theme party

First it has to be considered if the party will be organised under a special theme.

Examples for a theme party:

**Pirates**

**Princesses**

## Step 2 – number of guests

Now it's time to think about how many guests should be invited! As children often wish to invite half of the kindergarten it is best to limit the invitations according to the child's age. If it is your child's 5th birthday he/she can invite up to 5 friends.

## Step 3 – Create invitation cards!

Think about integrating the theme into your invitation

### Invitation card – Pirate ship

You need:

- ✓ handicraft carton
- ✓ shashlik skewer( refers to the number of invitations)
- ✓ a „flag“, white handicraft carton
- ✓ pirate sticker
- ✓ pen

### invitation card – crown

You need:

- ✓ purple handicraft carton
- ✓ sissors
- ✓ a golden pen
- ✓ golden gift wrap
- ✓ maybe some decoration stones to glue on

these information should be in each invitation:

- ✓ date and time
- ✓ place of the party
- ✓ theme of the party and a hint on guises
- ✓ ending time of the party

**Important:** the invitations should be send out 4 weeks before the party with a request on response.

## Step 4 – Think about your decoration

a special decoration referring to the theme.

## Step 5 – The birthday cake

If every guest has been welcomed every child finds a place on the birthday table. You could also create some nice place cards. The birthday child is seated at the end of the table so he/she has a good overview.

The self baked cake could be orientated on the motto and here are some delicious daintys to snack on:

### Cake pops

#### Ingredients for 18 cake pops:

- 300g of bright or dark flan case (convenience product or homemade)
- 50g – 100g confectioner's sugar
- 200g double cream
- 250g chocolate for melting
- sugar decor

Besides: 18 skewers out of wood and a piece of styrofoam to stick.

#### Time of preparation: 1 hour and 45 minutes to cool.

Crumb the cake very delicant – the more delicant the crumbs are the better the form will be later. Give in the cream cheese and the confectioner's sugar and mix it all together so a compact mass appears. Form small balls out of the mass and put it in the freezer compartment of the fridge. Fridge for 30 minutes. (If you don't have a freezer compartment you can also use the normal fridge). Meanwhiles you have to melt the chocolate and dip the cake pop pedicle into the the liquid chocolate and pit the cake pop. Put the balls for 10 more minutes into the fridge so the chocolate will freeze. Now dunk every cake-pop into the chocolade bath. Who wants to may put the balls straight up like a lolly and put the cake pup into a case or a piece of styrofoam. However it is also possible to leave the balls with the the head up onto a baking paper so it is easier so transport.

## Step 6 – game ideas

After the kitchen mess it is finally time to play. These birthday games shouldn't be missing:

### Who am I?

- ✓ The people come together and sit in a a circle.
- ✓ One person leaves the room while the rest of the guys search for a person out of a movie, television, sport or someone out of a cartoon.
- ✓ The person who is out of the room has to guess the name of the figure with asking questions which can just be answered by yes or no.
- ✓ If the person guesses wrong 10 times he loses and it's another persons turn.

## Limbo

2 player will be casted. They will hold a rod or broomstick. They held the stick on the bottom ends and take position. The other birthday guests have to from a series and try to get under the stick with their legs in front. If somebody touches the ground or his knee with the hand he is disqualified. In each round the stick has to be hold deeper to the ground and the difficulty degree will increase. Meanwhiles it is possible to listen to some music. Let' limbo!

After the playing crafting is also a great fun to kids. Herefore it is possible to do something for the motto. In evi- dence a crone for the princess or an eyepatch can be designed for pirates.

## Step 7 – Crafting instructions

Here is a selective:

### crone

This is needed:

- ✓ Coloured card, colour to your choice
- ✓ pencil
- ✓ scissors
- ✓ glue
- ✓ glitter, colored pens to decorate

### Pirate eyepatch

This is needed:

- ✓ card
- ✓ scissors
- ✓ rubber band

## Step 8 – Dinner

After the whole playing and crafting it is time for the big hunger. Here are some recipes:

### sausage snails

#### Ingredients:

- 1 cup of wiener sausages
- 1 package of flaky pastry
- 1 red pepper
- 1 egg

#### Preparation:

1. You cut 5 circles with a different size and put in the right way after the size of the sausages. Threw each layer there has to be filled a layer of yolk so everything fits good. This will be the snail shell after the baking.
2. Before the baking the whole house has to be spread with egg.
3. The sausage snails will go into the oven for about 15 minutes.
4. You can make 2 sensors out of the pepper. Open the sausages on the front with a knife and put in the sensors.

**Enjoy your meal!**

A great day comes to its end and letting them stay in your mind every child can be given a present for being the guest. A nice gesture that won't be forgotten by the guests so far. As a present small present packages filled with small things are useful. A nice conclusion for a birthday party.

Headband Veil, set of 2

Pencils safari, set of 6

Spinning Top Clown, set of 6

Pirate hat

Deco sticker pirates

Fire Brigade Paperbags, set of 3

Key Tag „Animal Babies“
